Product Overview

Professional LED Festoon Lighting

This versatile LED festoon string light is designed for demanding industrial, construction, and event environments. Featuring a durable plastic body with an aluminum heat sink for efficient thermal management, these lights provide consistent 360-degree illumination without dark spots. The system supports end-to-end connectivity, allowing for flexible configuration across various lengths with both rubber and PVC cable options.

Technical Specifications

Detailed specifications for the high-output 10W LED series featuring IP65 protection.

Energy Efficiency Class

A+

Color Temperature	2700K - 6500K
Color Rendering Index (Ra)	80
Operating Voltage	AC110V or 240V 50/60Hz
Working Temperature	-20°C to 55°C
Certifications	CE, RoHS

Features

Core Features

- End-to-end linkable design
- 360-degree illumination
- Clear or Milky PC diffuser options
- Hanging hook for hands-free operation
- Durable cable gland fixing

Model Configurations

Configuration options for the 6.5W LED series with IP54 rating.

Specifications for the 4W LED series, available in various lengths.

Available Specifications

Model	Length	Power	Ingress Protection
FL10W/14/05	14m	5 x 10W	IP65
FL10W/20/07	20m	7 x 10W	IP65
FL06W/22/10	22m	10 x 6.5W	IP54
FL22M	22m	10 x 4W	IP54
