

LiPo Battery Balance Charger

Compact and versatile, this balance charger is designed for Lithium Polymer (LiPo) batteries. It features multi-cell balancing, overcharge protection, and real-time voltage monitoring.

Overview

Compact LiPo Battery Management

This versatile balance charger is specifically designed for Lithium Polymer (LiPo) and Li-Ion batteries, offering precise management for 1-3 cell configurations. Equipped with advanced safety features including overcharge protection and real-time voltage monitoring, it ensures optimal battery performance and extended lifespan. Its intuitive controls and clear LCD display make it an ideal solution for RC models, drones, and various other power equipment applications.

Technical Specifications

Battery Chemistry

Li-Polymer • Li-Ion

Supported Voltages

3.7V, 7.4V, 11.1V

Supported Cell Count

3 Cells

Features

Safety & Monitoring

- Multi-cell balancing
- Overcharge protection
- Real-time voltage monitoring

User Interface

LCD Display with intuitive controls
