

# Liquid and Gas Flow Meter

This meter is designed for accurate measurement of liquid and gas flow rates. It features robust construction for industrial environments and a user-friendly interface.

## Product Overview

### High-Performance Flow Measurement

This high-performance flow meter is engineered for the precise measurement of both liquid and gas flow rates. Its robust construction ensures reliable operation in demanding industrial environments, while advanced sensors provide consistent, accurate readings. Designed for versatility, this unit is an ideal solution for process control, environmental monitoring, and energy management applications.

## Technical Specifications

### Primary Applications

- Process Control
- Environmental Monitoring
- Energy Management

### Supported Media

Liquid, Gas

## Design & Build

### Build Quality

Robust Construction • Industrial Grade

### Interface Features

Yes
