

Liquid and Gas Flow Meter

This meter accurately measures the flow rate of liquids and gases. It features a flanged connection for easy installation into pipelines.

Overview

Industrial Flow Measurement Solution

This high-precision flow meter is engineered for the accurate measurement of both liquid and gas flow rates in demanding industrial environments. Featuring a robust construction of durable materials such as cast iron or stainless steel, it is designed to withstand rigorous operating conditions. The unit incorporates flanged connections for seamless integration into existing pipeline infrastructure, ensuring reliable performance and ease of installation.

Technical Specifications

Construction Materials

- Cast Iron
- Stainless Steel

Measurement Capability

Liquid, Gas

Connection Type

Flanged

Key Features

Key Performance Indicators

1 Fluid Types

Measurement Versatility

Installation Features

Flanged Connection • Industrial Grade • Durable Housing
