

Liquid and Gas Flow Meter with Flanged Connection

This flow meter accurately measures the flow rate of liquids and gases. Its flanged connection ensures easy installation within industrial pipelines.

Product Overview

High-Precision Flow Measurement

This industrial-grade flow meter is engineered for the precise measurement of both liquid and gas flow rates within pipeline systems. Featuring a robust flanged connection design, it ensures secure and straightforward installation for demanding industrial environments. The device utilizes a cone-shaped internal obstruction to generate a pressure drop proportional to flow, enabling accurate monitoring via connected differential pressure transmitters.

Technical Specifications

Installation Features

- Flanged pipeline connection
- Integrated pressure taps
- Differential pressure transmitter compatible

Connection Type	Flanged
Compatible Media	Liquid, Gas
Measurement Principle	Differential Pressure (Cone-based)
