

Liquid and Gas Meter

This meter is designed for measuring the flow of both liquids and gases. It provides accurate readings for a variety of industrial applications.

Product Overview

Precision Metering Solution

This industrial-grade meter is engineered for the accurate measurement and monitoring of both liquid and gas flows. Designed for reliability in demanding environments, it ensures consistent performance and data integrity for your operational needs. Its robust construction makes it suitable for integration into various fluid management systems.

Technical Specifications

Compatible Media	Liquid, Gas
Application	Industrial Metering
