

Liquid Transport Truck

This is a medium-duty truck designed for transporting liquids. It is equipped with a tank body and heavy-duty tires, making it suitable for industrial or municipal applications.

Product Overview

Industrial Liquid Transport Solution

This medium-duty liquid transport truck is engineered for robust performance in industrial and municipal applications. Featuring a specialized tank body, the vehicle is ideal for the efficient and secure transport of various liquids, including water or fuel. Its durable build and high-traction tire configuration ensure reliability across diverse working environments.

Technical Specifications

Key Design Elements

- Heavy-duty tires
- High-capacity liquid tank
- Medium-duty cab configuration

Tank Configuration	Medium-duty industrial tank
Application Scope	Water Transport, Fuel Transport, Industrial, Municipal
