Product Overview

Precision Liquid Volumetric Filling System

This industrial-grade volumetric filling machine is engineered for high-precision, efficient filling of non-gas liquids. Constructed with a durable stainless steel frame for optimal hygiene, it features a multi-head filling system designed to maximize production throughput. The machine is versatile enough to support various industries, including food and beverage, pharmaceuticals, and cosmetics.

Technical Standards

Applicable Standards

- EN ISO 12100:2010
- EN 12463:2004+A1:2011
- EN 1672-2:2005+A1:2009
- EN 60204-1:2018

Certifications

2006/42/EC Machinery Directive, CE Compliant

Applications

Compatible Liquids

Wine, Rice Wine, Soy Sauce, Vinegar
