

# Lithium Battery Charger for Cameras

This charger is designed for lithium batteries commonly used in cameras. It features a cradle design to accommodate various battery sizes and shapes.

## Overview

### Universal Camera Battery Charger

This lithium battery charger is designed specifically for camera batteries, offering a reliable power solution for professional photographers and hobbyists alike. It features a compact cradle design with metallic charging pins and a clear LED indicator to monitor charging status in real-time. The unit is finished in a champagne gold housing, combining functionality with a sleek aesthetic.

## Compatibility

### Compatible Battery

Casio NP-20

## Power Specifications

### AC Input Voltage

**100 V**

Min AC Voltage

**240 V**

Max AC Voltage

### Voltage Switching

Auto-Switching

### DC Voltage

12 VDC

## Design & Build

### Key Features

- LED charging status indicator
- Metallic charging pins
- Cradle-style battery compartment
- Compact portable design

### Color

Champagne gold

### Housing

Metallic-finished plastic

## Identification

### Item Number

KQ-CA
