

Lithium Battery Travel Charger with European Plug

Compact travel charger designed for lithium battery-powered devices. It features a European plug for compatibility with EU standard power outlets, providing stable and efficient power conversion.

Product Overview

Compact Power Solution

This high-quality travel charger is specifically designed for reliable performance with lithium battery-powered devices. Featuring an elegant, compact design with seamless construction, it provides exceptional security and stability during the charging process. It is an ideal, cost-effective solution for professionals requiring consistent power conversion while traveling within European regions.

Technical Specifications

Coil Size	13.5 mm
Diameter	3 mm
Cable Length	1.5 m

Compliance and Logistics

Plug Standard	European Plug
Logistics Services	One-stop freight services, Custom specification production
