

# Lithium-Ion Battery 1250mAh 3.7V

This is a lithium-ion battery with a 1250mAh capacity and 3.7V nominal voltage. The battery's charge-up voltage is 4.2V and it complies with GB/T 18287-2000.

## Overview

### High-Performance Lithium-Ion Power Solution

This compact lithium-ion battery provides a reliable power source with a capacity of 1250mAh and 4.7Wh of total energy. Designed for consistent performance, it features a nominal voltage of 3.7V and supports a charge-up voltage of 4.2V. Compliant with industry standards, this cell is engineered for stable operation in compatible electronic devices.

## Electrical Specifications

### Capacity

**1250 mAh**  
Capacity

**4.7 Wh**  
Energy

Nominal Voltage	3.7 V
Charge-up Voltage	4.2 V

## Compliance and Identification

Model Number	Li3712T42P3h444865
Compliance Standards	GB/T 18287-2000
