

Lithium-Ion Battery 850mAh

This high-capacity lithium-ion battery is designed for various electronic applications. It features a compact form factor, high energy density, and reliable performance.

Product Overview

High-Performance Lithium-Ion Solution

This high-capacity lithium-ion battery is engineered for reliable performance in a wide range of electronic applications. Featuring a compact form factor, it offers high energy density, making it an ideal power source for portable devices and battery-powered equipment. Its robust design ensures consistent power delivery for demanding professional use.

Technical Specifications

Battery Chemistry

Lithium-Ion

Model Number

LI453450A

Rated Capacity

850 mAh

Key Features

Suitable Applications

- Portable electronic devices
- Power tools
- Battery-powered industrial equipment

Performance Highlights

850 mAh

Capacity
