

Lithium-Ion Battery Charger with Cooling System

High-performance lithium battery charger designed for efficient and reliable charging of lithium-ion battery packs. Features include a robust aluminum enclosure for heat dissipation, integrated cooling fan, and a comprehensive control panel with LED indicators for monitoring charging status.

Overview

High-Performance Lithium-Ion Charger

This high-performance lithium-ion battery charger is engineered for efficient and reliable power management. It features a robust aluminum enclosure designed for optimal heat dissipation, ensuring longevity during operation. Equipped with an integrated cooling fan and a comprehensive control panel with LED indicators, this charger provides clear, real-time monitoring of charging status for demanding professional applications.

Design & Construction

Enclosure Material	Aluminum
Cooling System	Yes

Features

Safety Components

- Integrated Cooling Fan
- High Voltage Warning System
- Fuse Protection

Monitoring Indicators	LED Indicators, Charging Status, Power Status, High Voltage Warning
-----------------------	---
