

Lithium-Ion Battery Pack for Video Equipment

High-capacity lithium-ion battery pack designed for professional video cameras. It provides reliable and extended power for demanding applications and features multiple LED indicators for monitoring battery level.

Overview

Professional Power Solution

This high-capacity lithium-ion battery pack is engineered specifically for professional video cameras and demanding production equipment. With its durable construction and integrated LED charge monitoring, it provides reliable, extended power during critical shooting sessions. It is fully compatible with industry-standard power systems, making it an essential tool for videographers and broadcast professionals.

Technical Specifications

Battery Chemistry	Lithium-Ion
Model Identifier	CH-001

Features

System Compatibility

Industry-Standard Power Systems • Professional Video Cameras

Monitoring Features	Multiple LED Indicators, Battery Level Monitoring
---------------------	---

Construction

Build Quality	Durable construction for field use
