

# Lithium-Ion Battery with Aluminum Case

This is a cylindrical lithium-ion battery. It features a protective aluminum case for enhanced durability.

## Product Overview

### Lithium-Ion Battery with Aluminum Case

This high-performance lithium-ion battery is engineered with a robust aluminum casing, providing superior durability and thermal management for demanding industrial applications. Designed for reliability and longevity, the aluminum housing offers excellent protection against environmental factors and physical impact. It serves as an ideal power solution for B2B applications requiring consistent energy density and structural integrity.

## Technical Specifications

Casing Material	Aluminum
Battery Chemistry	Lithium-Ion

## Key Features

Key Features	Aluminum Housing, High Energy Density, Durable Design, Thermal Management
