

# Lithium-Ion Rechargeable Battery

This is a high-performance lithium-ion battery designed for professional communication devices. It provides a stable voltage supply for optimal device operation.

## Overview

### High-Performance Power Solution

This high-performance lithium-ion battery is engineered for professional communication devices, ensuring reliable power output in demanding environments. Designed for extended battery life and consistent performance, it provides a stable voltage supply for optimal device operation. The unit features robust construction and meets essential safety compliance standards.

## Technical Specifications

### Performance Metrics

<b>7.4 V</b> Voltage	<b>2250 mAh</b> Capacity
-------------------------	-----------------------------

Voltage	7.4 Vdc
Capacity	2250 mAh
Energy Rating	16.65 Wh

## Certifications & Compliance

### FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Certifications	CE, FCC Part 15
