

Lithium-Ion Rechargeable Battery

This is a high-capacity lithium-ion battery designed for electronic devices. It operates at 3.7V and has a capacity of 3600mAh.

Overview

High-Capacity Power Solution

This high-capacity lithium-ion rechargeable battery is engineered to provide reliable power for various electronic devices. With a standard voltage of 3.7V and a robust 3600mAh capacity, it ensures long-lasting performance for your equipment. Designed with safety in mind, it includes clear operational guidelines to maintain battery health and prevent potential hazards during use.

Technical Specifications

Capacity

3600 mAh

Capacity

Rated Voltage

3.7 V

Battery Chemistry

Li-ion

Model Identifier

SD0131-PSP110

Safety & Usage

Safety Instructions

- Do not burn or place in fire
- Prevent short circuits between positive and negative terminals
- Use only with manufacturer-approved or original chargers

Safety Compliance

Safety Warning Included
