

# Lithium-Ion Rechargeable Battery 7.2V 1450mAh Replacement

This high-capacity lithium-ion rechargeable battery is designed as a replacement for Sony NP-FM50/QM51 batteries. It features a 7.2V output and a 1450mAh capacity, providing extended power for compatible devices.

## Product Overview

### High-Capacity Replacement Battery

This high-capacity lithium-ion rechargeable battery is engineered as a reliable replacement for Sony NP-FM50/QM51 batteries. Providing a steady 7.2V output and 1450mAh capacity, it ensures extended runtimes for your compatible devices. Designed for professional use, this battery offers a dependable power solution for photography and video equipment requiring this specific format.

## Technical Specifications

Voltage	7.2 V
Capacity	1450 mAh
Battery Chemistry	Lithium-ion (Li-ion)

## Compatibility

### Compatible Models

- Sony NP-FM50
- Sony NP-QM51

## Safety & Usage

Safety Cautions	Use specified charger only, Avoid improper connections, Do not dispose in fire, Avoid excessive heat, Do not crush or puncture, Avoid short-circuiting
