

Lithium Polymer Battery 3.7V 500mAh

This lithium polymer battery has a capacity of 500mAh and a voltage of 3.7V. It is designed for use in speakers and other electronic devices.

Product Overview

Compact Lithium Polymer Power

This 3.7V 500mAh Lithium Polymer battery is engineered for reliability in compact electronic applications. Its lightweight design and integrated connector make it an ideal power source for portable audio devices, IoT hardware, and wearable electronics. Designed for seamless integration, this battery provides a consistent and stable power output for low-power electronic circuits.

Technical Specifications

Nominal Voltage	3.7 V
Capacity	500 mAh
Model Identifier	LP503035
Manufacturing Date	2013-10-13

Application & Features

Design Benefits

- Compact form factor
- Lightweight construction
- Easy circuit integration

Typical Applications	Portable Audio, IoT Devices, Wearables, Small Electronics
Connection Type	JST Connector
