

Lithium Polymer Battery

This is a cylindrical lithium polymer battery. It has positive and negative terminals extending from either end and is wrapped in silver foil.

Product Overview

High-Performance Lithium Polymer Energy Solution

This cylindrical lithium polymer battery is designed for reliable power delivery in compact electronic applications. Featuring a durable silver-colored foil casing with distinct terminal markings, it ensures ease of integration for engineers and designers. Its robust construction makes it an ideal choice for portable devices requiring consistent performance and longevity.

Technical Specifications

| | |
|------------------------|------------------------------------|
| Battery Chemistry | Lithium Polymer (LiPo) |
| Model Identifier | 80350 |
| Terminal Configuration | Axial Terminals, Positive/Negative |

Design & Construction

| | |
|-----------------|----------------------|
| Form Factor | Cylindrical |
| Casing Material | Protective Foil Wrap |
