

Lithium Polymer Mobile Phone Battery

Lithium polymer battery designed for mobile phone power. It has a 750 mAh capacity.

Overview

High-Performance Lithium Polymer Battery

This lithium polymer battery is designed specifically for mobile phone power supply applications. With a compact form factor and reliable energy density, it serves as a dependable replacement or component for mobile devices. Engineered for consistent performance, it meets standard requirements for mobile electronics.

Technical Specifications

Model Number	LI413450A
Capacity	750 mAh
Chemistry	Lithium Polymer
Primary Application	Mobile Phone, Portable Electronics
