

# Lithium-Polymer Rechargeable Battery

## 1400mAh

Rechargeable lithium-polymer battery with a 1400mAh capacity. It has a limited charge voltage of 4.4V and a nominal voltage of 3.85V.

### Overview

#### High-Performance Li-Polymer Battery

This rechargeable Lithium-Polymer battery is engineered for reliable power delivery in compact devices. Featuring a nominal voltage of 3.85V and a capacity of 1400mAh, it provides stable energy for demanding applications. Built to strict safety standards, this battery is an essential component for high-quality electronics.

### Technical Specifications

#### Energy Capacity

**5.3 Wh**

Minimum Energy

**5.51 Wh**

Typical Energy

Rated Capacity	1400 mAh
Nominal Voltage	3.85 V
Limited Charge Voltage	4.4 V

### Compliance & Safety

#### Safety Guidelines

- Charge only with 5.0V output charger
- Do not disassemble, damage, or dispose of in fire
- Do not store in temperatures above 140°F (60°C)
- Stop using immediately if immersed in water
- Do not use if the battery is swelling

#### Usage Notes

Remove before using in dash camera

Compliance Standards	GB31241, CE
