

Livestock Feed Mixer

This TMR (total mixed ration) feed mixer prepares a consistent, nutritionally balanced feed mixture for livestock. The machine ensures thorough blending of feed components using a heavy-duty steel mixing drum and hydraulic systems for efficient operation.

Product Overview

High-Efficiency TMR Feed Mixer

This Total Mixed Ration (TMR) feed mixer is engineered to streamline livestock feeding processes by providing a consistent and nutritionally balanced mixture. Designed for ease of use, it significantly reduces manual labor while ensuring rapid, uniform blending of feed components. With a versatile capacity range of 3-30 cubic meters, this machine is an essential tool for efficient cow feeding operations.

Technical Specifications

Capacity Range	3 - 30 cbm
Chassis Design	Single Axle, Dual Wheels, Towable
Drum Construction	Heavy-duty steel

Features

Key Operational Benefits

- Uniform feed blending
- Labor cost reduction
- Rapid feeding operation
- Easy-to-use control interface

System Controls	Hydraulic mixing and dispensing
