

Livestock Feed Pellet Production Machine

This feed pellet machine is designed for agricultural use, specifically for processing feed into pellet form. It features a multi-roller system for efficient pellet formation, a robust frame for stability, and a hopper for continuous material feeding.

Product Overview

High-Efficiency Feed Pellet Production

This ring die feed pellet machine is engineered for the efficient production of high-quality feed pellets suitable for various types of poultry and livestock. Designed for durability, the machine features stainless steel components in critical areas including the feeder, conditioner, and down material slot. Operators can easily adjust the final pellet size by utilizing different ring dies with varying diameter die holes.

Technical Specifications

Suitable For

Poultry Feed • Livestock Feed

Machine Type

Ring Die Feed Pellet Machine

Stainless Steel Components

Feeder, Conditioner, Down Material Slot

Adjustability

Adjustable pellet size via ring die diameter
