Product Overview

Professional Livestock Weighing Solution

This livestock weighing scale is engineered for precision and durability in demanding agricultural environments. Featuring a robust enclosure with a gated design, it ensures the safety of animals while the non-slip surface provides stability during the weighing process. Advanced dynamic weighing technology delivers accurate weight data even when livestock are moving on the platform, making it an essential tool for efficient farm management and veterinary applications.

Technical Specifications

Capacity Range

- 1 Ton
- 2 Tons
- 3 Tons
- 5 Tons

Available Platform Sizes

- 1.0m x 1.0m
- 1.2m x 1.2m
- 1.2m x 1.5m
- 1.5m x 1.5m

Customizable Dimensions

Yes

Features & Construction

Indicator Features

Digital Display • A9 Mini-Printer Included

Key Features

Dynamic Weighing Technology, Waterproof Structure, Non-slip Pattern Plate, Knock-down Fences, Integrated Printer

Suitable For

Pigs, Cattle, Sheep
