

Loader Backhoe Cutting Edge Blade

This cutting edge blade is designed for loader and backhoe applications. Manufactured from hardened steel, it provides optimal strength and abrasion resistance.

Product Overview

Heavy-Duty Loader Backhoe Cutting Edges

These high-performance cutting edges and end bits are engineered for demanding construction and material handling environments. Manufactured from hardened, abrasion-resistant steel, they provide superior durability and extended wear life for grading and leveling tasks. Precision-engineered mounting holes ensure a secure fit and straightforward installation on compatible loader backhoe equipment.
