

Loader Grapple Attachment

This heavy-duty loader attachment is designed for efficient material handling. It features a robust frame and durable tines for grabbing and moving large volumes of materials such as logs, brush, and debris.

Product Overview

Heavy-Duty Loader Grapple

This robust loader grapple attachment is engineered for efficient material handling across demanding environments. Featuring a heavy-duty frame and durable tines, it is specifically designed to secure and transport large volumes of materials, including logs, brush, and various debris. It serves as an essential tool for increasing versatility and productivity in construction, agriculture, and landscaping operations.

Application & Usage

Suitable Materials

- Logs
- Brush
- Debris

Primary Applications

Construction, Agriculture, Landscaping, Material Handling

Design Features

Build Quality

Heavy-duty • Robust Frame • Durable Tines
