

Loader Windshield Wiper System

This wiper system is designed for loaders and other construction machinery. It ensures effective cleaning of the windshield, maintaining visibility and safety during operation.

Product Overview

Loader Windshield Wiper System

This professional-grade windshield wiper system is specifically engineered for loaders and heavy construction machinery. Designed for durability and longevity, the system includes a robust motor, precision linkage, heavy-duty arms, and an effective wiper blade. It ensures optimal visibility and operational safety for equipment operators even in the most demanding weather conditions.

Technical Specifications

Included Components

- Wiper Motor with electrical connector
- Motion Linkage system
- Durable metal wiper arms
- Standard replacement wiper blade

Service Life

Extended Service Life • Rugged Construction

Compatibility

Loader, Construction Machinery, Heavy Equipment
