Product Overview

Precision Shape Duplication

This lockable contour gauge is a versatile tool engineered for precisely transferring complex shapes and contours onto various materials. It features a high-density array of fine pins that conform seamlessly to the profile of any object. The integrated locking mechanism securely holds the pins in place, ensuring accurate duplication for woodworking, tiling, flooring, and metalworking projects.

Technical Specifications

Material	Durable Plastic
Measurement Range	25 cm
Key Features	Locking Mechanism, High-Density Pins, Integrated Measurement Markings, Compact Design

Applications

Suitable Applications

- Woodworking
- Tiling
- Flooring Installation
- Metalworking
- General DIY Projects

How to Use

Instructions

Step	Action
1	Place gauge against the item to be measured.
2	Push firmly to create the correct template.
3	Engage the locking mechanism to secure pins.
4	Transfer the template to the workpiece and mark accordingly.
5	Cut and fit the material as required.
