

Locking Pliers with Adjustable Jaws

Locking pliers are versatile hand tools used for gripping, clamping, and turning objects. They feature adjustable jaws that can be locked in place, providing a secure hold.

Product Overview

Professional Locking Pliers

These locking pliers, commonly known as Vise-Grips, are essential hand tools designed for heavy-duty gripping, clamping, and turning applications. Featuring an advanced compound action mechanism, they deliver exceptional clamping force while maintaining ease of use. Constructed from high-quality, heat-treated alloy steel, these pliers are built for durability and long-term performance in demanding environments.

Technical Specifications

Tool Type

Hand Tool • Locking Pliers

Operational Benefits

- Secure locking hold for reliable clamping
- Compound action for increased clamping force
- Quick-release lever for fast unlocking
- Ergonomic design to reduce hand fatigue

Material

Heat-treated alloy steel

Key Features

Adjustable Jaws, Locking Mechanism, Compound Action, Ergonomic Handles
