

# Log and Branch Splitter

This log and branch splitter is designed for efficient processing of logs and branches. Its sturdy construction ensures durability and long-term performance in demanding environments.

## ADDITIONAL IMAGES

## Overview

### Efficient Wood Processing Solution

The Log and Branch Splitter is a robust agricultural machine designed for the efficient processing of wood waste and branches. It features a sturdy construction and a wide input hopper, making it an essential tool for streamlining wood processing operations in forestry and farm settings. The machine is designed for safety and reliability, ensuring productive performance in demanding environments.

## Technical Specifications

### Overload Clutch Torque

**1600 Nm**  
Torque Limit

Max Diameter (Hard, Dry Oak)	80 mm
Max Diameter (Hard, Fresh Oak)	100 mm
Max Diameter (Soft, Fresh Pine)	120 mm

## Operational Features

Mounting	Rear three-point hitch tractor mount
Drive System	Cardan shaft with overload clutch
Safety Features	Overload protection, Enclosed moving parts, Safety guards, Output chute
