

# Log Splitting Maul Axe with Wooden Handle

This maul splitting axe is designed for splitting logs and firewood. It features a heavy, wedge-shaped head made of hardened steel for efficient splitting, with a long, straight handle crafted from durable wood for a comfortable grip and optimal leverage.

## Product Overview

### Heavy-Duty Log Splitting Performance

This maul splitting axe is engineered specifically for efficient log and firewood processing. Featuring a wedge-shaped, hardened steel head, it delivers the necessary force for demanding splitting tasks. The durable wooden handle is designed for optimal leverage and a secure, comfortable grip, ensuring reliability for both occasional and regular use.

## Technical Specifications

### Head Design

Wedge-shaped • Heavy-duty

Head Material	Hardened Steel
Handle Material	Wood

## Usage & Application

### Suitability

- Occasional wood splitting
- Regular wood splitting tasks

Primary Application	Log Splitting, Firewood Processing
