

Long-Distance Wireless Barcode Scanner

This long-distance wireless barcode scanner is designed for efficient data capture. It features a wireless connection and extended range, allowing users to scan barcodes from a distance.

Product Overview

Professional Wireless Scanning

The XZ-9309 is a high-performance, long-distance wireless barcode scanner engineered for professional environments. By utilizing a dedicated base station, it ensures seamless and reliable data transmission for improved workflow efficiency. Its durable and ergonomic construction makes it an ideal solution for intensive tasks within retail, warehousing, and logistics sectors.

Technical Features

Design & Build

Ergonomic • Robust

Connectivity

Wireless with Base Station

Target Applications

Retail, Warehousing, Logistics
