

Long Nose Pliers with Ergonomic Handles

These long nose pliers are designed for precision work in tight spaces. Their durable steel construction ensures long-lasting performance for gripping, bending, and cutting wires.

Overview

Precision Engineering for Tight Spaces

These long nose pliers are expertly designed for intricate tasks requiring precision in confined areas. Featuring ergonomic handles for enhanced comfort and control, they are ideal for gripping, bending, and cutting wires or small components. Built from durable, high-quality steel, these pliers ensure long-lasting performance for demanding electrical, automotive, and general repair applications.

Technical Specifications

Material	Durable Steel
Handle Design	Ergonomic (Yellow & Black)
Primary Functions	Gripping, Bending, Cutting

Applications

Suitable Industries

Electrical • Automotive • General Repair
