

Long Nose Pliers with Ergonomic Handles

These long nose pliers are designed for gripping small objects and bending wires. Their long, tapered jaws are ideal for reaching into tight spaces.

Product Overview

Professional Long Nose Pliers

These long-nose pliers are essential hand tools designed for precision work, including gripping small components, bending wires, and reaching into confined spaces. Featuring long, tapered, and serrated jaws, the tool ensures a secure hold on a variety of materials. The design prioritizes user comfort with ergonomically shaped, non-slip handles, making it a durable and reliable choice for intensive use.
