

Long Nose Pliers with Fine Point Jaws

Long nose pliers are versatile hand tools designed for gripping, bending, and cutting wires and small components in confined spaces. Featuring elongated jaws that taper to a fine point, they provide precise control and access in intricate tasks.

Product Overview

Precision Engineering for Intricate Tasks

These long nose pliers are designed for professionals requiring precision in confined spaces. Featuring elongated jaws that taper to a fine point, they allow for excellent control when gripping, bending, or cutting small components. The ergonomic handle design is engineered to reduce hand fatigue, making them an ideal choice for electronics repair, jewelry making, and detailed assembly work.

Key Features

Design Highlights

- Elongated jaws for deep access
- Fine point tip for precision
- Ergonomic handle for comfort
- Versatile gripping and cutting capability

Ideal Applications

Electronics Repair, Jewelry Making, Wire Bending, Small Component Handling, DIY Projects
