

Long Nose Pliers with Insulated Grip

These long nose pliers feature a slender, tapered jaw for detailed work in confined spaces. They are constructed from durable metal and have insulated black and yellow handles for a secure grip.

Product Overview

Precision Engineering for Confined Spaces

These long nose pliers are designed with a slender, tapered jaw profile, allowing for exceptional control and manipulation in tight or restricted areas. Built for durability and reliability, they are an essential tool for professional electrical work, intricate jewelry assembly, and general maintenance tasks. The ergonomic, insulated handle design ensures both user comfort and safety during operation.
