

Long Nose Pliers with Wire Cutter

These long nose pliers feature precision-machined jaws suitable for gripping, bending, and cutting wires in confined spaces. Their high-quality steel construction ensures durability, and the ergonomic handles provide a comfortable grip.

Product Overview

Precision Engineering for Professionals

These long nose pliers are designed for precision-machined gripping, bending, and cutting tasks in confined spaces. Built from high-quality steel, they offer exceptional durability and a long service life for demanding environments. The ergonomic handle design ensures a secure grip while minimizing hand fatigue during extended, repetitive use.

Technical Specifications

Primary Functions

- Gripping
- Bending
- Cutting wires

Material	High-quality steel
Key Features	Wire Cutter, Corrosion-Resistant, Precision-Machined Jaws, Ergonomic Handles
