

Long Nose Pliers

Long nose pliers are versatile hand tools designed for gripping, bending, and cutting wires and small components in tight spaces. Featuring elongated jaws that taper to a fine point, they provide precise control and access in confined areas.

Product Overview

Precision Long Nose Pliers

Long nose pliers are versatile hand tools designed for gripping, bending, and cutting wires and small components in tight spaces. Featuring elongated jaws that taper to a fine point, they provide precise control and access in confined areas. Typically constructed from hardened steel for durability, these pliers are essential for electrical work, jewelry making, and various precision tasks.

Key Features

Primary Applications	Electrical Work, Jewelry Making, Precision Tasks, Wire Bending, Component Gripping
-----------------------------	--

Design & Construction

Safety Features	
Insulated Handles	
Material	Hardened Steel
Jaw Design	Elongated, tapered to a fine point
