

Long-Range Infrared PTZ Surveillance Camera

This auto focus night vision system delivers powerful long-range infrared surveillance. The camera features a robust pan-tilt mechanism for wide-area coverage and enhanced visibility in low-light conditions.

Overview

High-Performance Long-Range Surveillance

This long-range infrared PTZ surveillance camera is engineered for demanding outdoor security applications. Featuring high-intensity IR illumination and advanced pan-tilt-zoom capabilities, it ensures reliable visibility in low-light conditions across extended distances. With robust operating temperature ranges and auto-focus functionality, this system provides consistent, high-quality monitoring for wide-area coverage.

Technical Specifications

Model Comparison

Model	IR Range	Zoom	Resolution	Power
TD12XZ100	100 meters	12x	480 lines	AC200V/20W
TD15XZ200	200 meters	15x	480 lines	AC200V/30W
TD20XZ300	300 meters	20x	520 lines	AC200V/50W

Minimum Illumination	0.01LUX
Focus Mechanism	Auto Focus

Environmental

Operating Temperature Range	-10°C, -40°C
