

Long-Range Observation Monocular Telescope

This high-performance optical instrument is designed for long-distance observation. It features a variable zoom eyepiece, fully multi-coated lenses, and a rugged, weatherproof housing.

Product Overview

Professional Long-Range Observation

This high-performance optical monocular is engineered for exceptional clarity and long-distance observation. It features premium fully multi-coated lenses that maximize light transmission for crisp, clear imagery. Housed in a rugged and weatherproof chassis, it is designed to withstand demanding environments, making it an ideal choice for nature study, birdwatching, and professional surveillance tasks.

Optical Specifications

Optical Highlights

Fully multi-coated lenses, Variable zoom eyepiece, High-contrast optics

Durability and Design

Build Quality

- Ruggedized housing
- Weatherproof construction
- Designed for outdoor use

Applications

Suitable Applications

Birdwatching • Nature Observation • Surveillance
