

Long Reach Lopping Shear

This lopping shear is designed for efficient cutting of thick branches. It features high-carbon steel blades for lasting sharpness and long handles for increased leverage and reduced strain.

Product Overview

Professional Long Reach Lopping Shear

This professional-grade 30.5-inch anvil lopping pruner is engineered for efficient and effortless cutting of thick branches. Featuring a high-carbon steel blade with a Teflon coating, it ensures lasting sharpness and durability for demanding gardening tasks. The long handles provide increased leverage to reduce user strain, while ergonomic rubber grips ensure comfortable and secure handling during extended pruning sessions.
