

Long Reach Lopping Shears

These lopping shears are designed for efficient pruning and cutting of branches. They feature long handles for extended reach and leverage, reducing strain during operation.

Product Overview

Professional Long Reach Lopping Shears

These anvil loppers are engineered for heavy-duty pruning tasks, featuring a gear-action mechanism that significantly increases cutting power while reducing operator effort. The lightweight aluminum handle design ensures comfortable, extended use, while the telescopic mechanism allows for precise reach adjustments. Built with a high-quality, non-stick coated SK5 blade, these shears deliver clean cuts and long-lasting performance for professional landscaping needs.

Technical Specifications

Cutting Capacity	35 mm
Maximum Length	970 mm
Telescopic Mechanism	6-step lever with locking pin

Materials & Construction

Blade Material	SK5 Steel
Blade Coating	Non-stick coating
Handle Material	Lightweight Aluminum

Key Features

Cutting Action	Anvil, Gear Action
