

Long Steel Measuring Tape

This long steel measuring tape is designed for accurate and extended length measurements. It features a durable, enclosed case for protection and easy handling.

Product Overview

Precision Measurement Tool

The Long Tape Measuring Series JH-L07 is a robust manual tool engineered for accurate, extended-length measurements in professional environments. Featuring a durable, enclosed case, it is built to withstand demanding job sites while ensuring easy handling and storage. The high-quality, flexible tape includes clear, dual-scale markings in both metric and imperial units, making it versatile for construction, surveying, and infrastructure projects.

Technical Specifications

Model Number	JH-L07
Measurement Units	Metric, Imperial

Design & Build

Case Design	Enclosed protective case
Retraction Mechanism	Yes

Applications

Recommended Applications

- Construction
- Surveying
- General Field Measurement
