

Lopping Shears

These lopping shears are designed for efficient and precise pruning. Their durable blades ensure clean cuts, while the ergonomic handles provide a comfortable grip.

Product Overview

Professional Anvil Lopping Shears

These high-performance anvil lopping shears are engineered for efficient and precise pruning in professional gardening and landscaping environments. Featuring a gear-action mechanism, they provide significantly greater cutting power with reduced user effort. The lightweight aluminium handle construction ensures comfortable, extended use, while the durable SK5 blade with a non-stick coating guarantees clean cuts and a long service life.

Technical Specifications

Cutting Capacity	35 mm
Maximum Extended Length	970 mm
Blade Material	SK5 Steel
Blade Coating	Non-stick
