

Loudspeaker Driver for Audio Systems

This loudspeaker driver is designed for professional audio environments. It provides clear and powerful sound reproduction, optimized for efficient power handling and minimal distortion.

Overview

Professional Audio Performance

This high-performance loudspeaker driver is engineered for demanding professional audio applications. It provides clear and powerful sound reproduction with an impressively wide frequency response. Designed with robust construction, it ensures durability and consistent performance for public address and sound reinforcement systems.

Technical Specifications

Impedance	8 Ω
Power Handling	32 W
Model Identifier	GH-7

Performance Features

Key Performance Metrics

32 W Power Rating	8 Ω Impedance
Suitable Applications	Sound Reinforcement, Public Address Systems, Professional Audio
