

Loudspeaker Driver for Audio Systems

This loudspeaker driver is engineered for professional audio setups. It features a durable cone, high-excursion suspension, and a powerful motor for clear sound and deep bass.

Overview

Professional Audio Excellence

This high-performance loudspeaker driver is engineered specifically for demanding professional audio applications. It features a robust cone material designed for exceptional durability and precise sound reproduction. With an advanced high-excursion suspension system and a powerful motor structure, this driver delivers deep bass response while maintaining high sensitivity and low distortion levels, making it ideal for both subwoofer and full-range speaker system integration.
