

Louvered Exhaust Fan for Wall or Window Mounting

This exhaust fan is designed for ventilation purposes, featuring a louvered front to prevent backdrafts. Its square frame allows for easy installation in walls or windows and is suitable for removing stale air, odors, and moisture.

Overview

Versatile Ventilation Solution

This louvered exhaust fan is engineered for efficient air circulation in both residential and light commercial environments. Featuring a specialized louvered front design, it effectively prevents backdrafts and protects the interior from outdoor elements when the unit is powered off. Its durable construction and square frame design allow for seamless installation into walls or windows, making it an ideal choice for bathrooms, kitchens, and other enclosed spaces requiring moisture and odor removal.

Key Features
