

# Low-Floor City Bus

This is a low-floor city bus designed for efficient passenger flow. The bus is equipped with large windows and a streamlined exterior.

## Overview

### Urban Transit Solution

This low-floor city bus is engineered for efficient urban transportation, prioritizing passenger accessibility and comfort. Its streamlined exterior design and large window configuration ensure optimal natural light and visibility for commuters. Designed with multiple entry points, it facilitates rapid passenger flow, making it an ideal choice for high-frequency city transit routes.

## Design & Accessibility

### Exterior Highlights

- Large panoramic windows
- Multiple-door configuration
- Streamlined aerodynamic profile

<b>Floor Design</b>	Low-floor
<b>Accessibility Features</b>	Low-entry, Easy Access

## Vehicle Type

### Primary Application

Urban Transit • Public Transportation
