

# Low-Noise Power Generator

This power generator is designed for low-noise operation, producing only 85DBA at 1 meter and 75DBA within 7 meters. Its fully enclosed structure minimizes sound emissions, making it suitable for use in noise-sensitive environments.

## ADDITIONAL IMAGES

## Product Overview

### Low-Noise Power Generator

This soundproof power generator is engineered for reliable outdoor performance with a focus on noise reduction and durability. Its modular, assembly-type canopy design ensures both ease of maintenance and high-quality ventilation for stable operation. With corrosion-resistant materials and intuitive control interfaces, this unit is built to provide a dependable power source in noise-sensitive environments.

## Performance

### Noise Level

**85 dBA**

Within 1 meter

**75 dBA**

Within 7 meters

## Design and Construction

### Material Specifications

- Steel body canopy
- Galvanized phosphoric acid exterior paint
- Polyester powder finish
- Stainless steel screws and locks

### Canopy Features

Soundproof, Rain-proof, Modular Design, Ventilated, Corrosion Resistant

## Maintenance and Accessibility

### Access Points

- Operation room with observation window
- Bottom sewage outlet
- Bottom oil discharge outlet
- Bottom air outlet
- Independent output switch box
